

Young Electrical Professionals

Spring "CEO" Panel and Networking Reception
April 17, 2018 – Union League Club of Chicago

“Electrical Industry Work Flow: how an electrical project moves through the Industry Segments, from Project Inception to Completion.”

As a newcomer to the Industry, it can take a while for a new employee to figure out what a Distributor does, or what is the role of the Manufacturer’s Representative? Understanding the flow of work through each industry segment is a vital part of an electrical industry career. Join us on April 17th and listen to Industry leader’s talk about their role in the industry and get a better understanding of how each segment plays a part in the construction process.
