

# BRING MORE TO THE TABLE

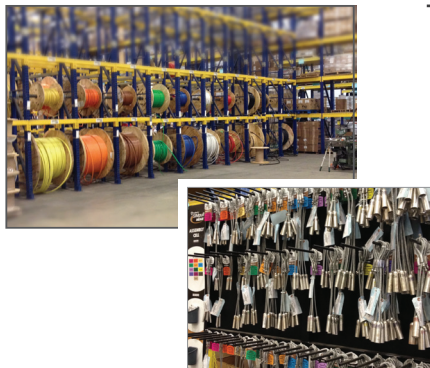

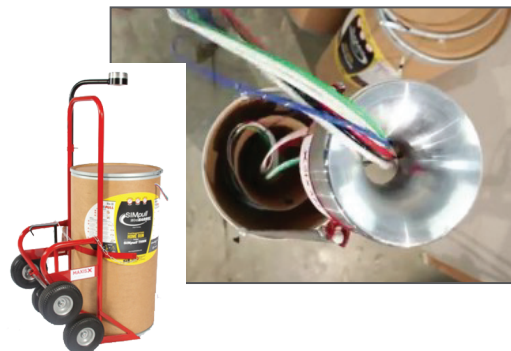

*With Brook Electrical Supply & Southwire® Solutions*

With more pressure than ever to make the most out of your time on the job site, look to Brook Electrical Supply for innovative solutions from Maxis™ and Southwire® that will help ease the burdens of material handling, setup time, and overall effort on the job.

Take the guesswork, potential miscalculations and hassle out of your next wire pull. Spec and plan your job in advance with the SIMpull Cable Pull™ calculator provided by Brook Electrical. From there you can take delivery of your wire on Maxis Jax™ stands paralleled and ready to go, add options from our full stocking line of Maxis cable-pulling tools like these Maxis Triggers™, Cable Pullers, and Feeders, and ensure that your job runs as smoothly as possible.

If you are looking for the next great way to run your next branch circuit, look no further than the Southwire® Baralle™ technology. This system contains multiple branch circuit conductors paralleled into a barrel package for increased maneuverability, decreased effort, and more productive wire pulls.

Why make your life harder in the field when Brook Electrical can help simplify a difficult and messy process? With a full line of stock cables in both black and standard colors from the Southwire® SIMpull line, as well as on-site experts to pre-install SIMpull Heads™ on your next cable order, Brook Electrical can help make your next wire pull a breeze.
