

# CTF Virtual Panel Event

## Technology in Education: Bridging the Digital Divide Virtual Panel Event

2:00 pm Central, Thursday, October 29, 2020

School Districts are faced with a challenge: How to bridge the digital divide gap as E-Learning and Distributed Learning models become more prevalent. This is a problem that Districts have identified for several years; but has been escalated to a high priority during current Covid-19 social distancing restrictions. There are many aspects of the digital divide: Students having the right personal equipment, having access to the internet, inadequate class-room technology, and more. This program will focus on the solutions available to Education Administrations.

### Moderator

**Jeff Drenovsky, ESD**

### Expert Panelists

**John Connolly, HS District 230**

**Josh Gerst, RF Connect**

**Eric Toenjes, Graybar**

**Steve Wimsatt, CommScope**
